

FILTER KIT

Pancake filter YF-2575 is used on every Ford vehicle being serviced and replaces and consolidates various Motorcraft and Ford filter kits being used. All compressor replacements should have a new service filter kit installed to clean the refrigerant and to remove any debris or contaminants.

Install pancake filter YF-2575 in the liquid line between the condenser and the orifice tube (see diagram). Be sure the filter inlet is toward the Condenser

Each service filter kit includes the following items:

- One (1) Pancake filter
- One (1) Instruction Sheet

NOTE: Follow all safety and service precautions outlined in the vehicle's Service Manual and the instruction sheet.
